COM YARDAGE:

787-10: 4 yards for every chair (based on no repeat, non-directional material)

787-20: 8 yards for every settee (based on no repeat, non-directional material)

787-30: 11 yards for every sofa (based on no repeat, non-directional material)

SPECIFICATION:

- Chair frame shall be constructed from solid kiln dried hardwood. Lumber to be dried to a final moisture content level between 6% - 8%.
- Front and rear legs to be constructed from single stock lumber. Finished dimension at the top of leg to be 2" x 2" tapering to 1 1/2" x 1 1/2" at bottom.
- Front and rear legs are attached to a solid hardwood bottom frame.
- The frame components are connected together by dowels, corner blocks, screws and glue.
- The seat is built of steel spring construction. High density CAL 117 FR foam is applied.
- Back and seat upholstery is a pull-over method, glued and stapled to the frame.
- Also available in custom sizes and with arms (as shown), upon request. Subject to minimum quantities
