---

### SPECIFICATION:

- All bases start with a bottom X piece that is laser cut solid steel bar, all X pieces have adjustable glides in them to allow leveling on uneven floors.
- A 3" diameter 14 gauge metal column with cast steel top mounting plate is attached with 3/8" threaded rod from top to bottom (18" and 24" spreads). The column is 4" diameter on the 30" spread. The top mounting plate spread is an 11"x11" top plate for 18" and 24" spread bases and 14"x14" top plate for 30" spread bases.
- Bottom plate 1/2" thick steel with countersunk center hole, tapped holes for levelers.
- Finishes are available in any ISA International standard powder coat and plated finishes. Pricing varies based on finish selection
- Base spread sizes and the tops that can be used with them are as follows:
  - 18"x18" spread for top 20"-26"
  - 24"x24" spread for top 30"-36"
  - 30"x30" spread for top 42"-54"
- Also available in bar or counter height or custom heights, upon request.
- Also available with flip top mechanism. Flip top mechanism may affect overall table height by up to 1".
- Shipped unassembled unless otherwise specified.
