

Specification for Standard Model #2700 Roundabout table

- All bases start with a 2" thick solid particle board kick.
- The body consists of a 3/8" thick curved plywood wrapped around the body and a 3/4" thick particle board applied to the top surface, stapled and glued to 3/4" thick interior particle board support.
- All surfaces to be sanded.
- Contact cement is used to apply plastic laminate or Maple veneer to all surfaces.
- Maple veneer will be stained and sealed.
- Also available in custom sizes upon request (subject to minimum quantity).
