SPECIFICATION:

- Chair/Stool frame shall be constructed from solid kiln dried beech. Lumber to be dried to a final moisture content between 6% - 8%.
- All legs are to be connected by way of solid beech seat rails through mortise and tenon.
- Stool: Double side stretchers run between front and back legs, which are dowelled and glued together. Front and back stretchers run side to side. Front stretcher features a metal footrest, available in Black, Brass or Satin Aluminum.
- The assembled chair/stool is connected together by dowels, corner blocks, bolts and glue.
- All exposed wood is finished in any standard ISA wood finish and receives a clear urethane coat for added durability.
- The seat is constructed of ½" thick solid core ply with webbing and applied to the solid beech frame. The seat is attached to the beech frame via screws. High density CAL 117 FR foam and upholstery are applied after assembly.
- All styles include nail-in nylon glides.
- Stool also available in Counter height (24" seat height).
