

699 RADCLIFFE ARM CHAIR

SPECIFICATION:

- Chair frame shall be constructed from solid kiln dried beech wood. Lumber to be dried to a final moisture content level between 6% 8%.
- Front and rear legs and attached by a solid beech frame. The chair frame and seat frame are connected together by dowels, corner blocks, bolts and glue.
- The seat shall be ½" thick solid core ply and applied to the solid beech frame. The seat is attached to the beech frame via screws. CAL-117 FR high density foam at 2" thick is applied on seat; ½" thick is applied on back. Upholstery material is applied as specified.
- Back and seat upholstery is a pull over method stapled to the frame. Cushions are foam with Dacron wrapping. Cushions are attached to the frame as a standard.
- All exposed wood is finished in any standard ISA wood finish and receives a clear urethane coat, low gloss, for added durability.
- Includes nail-in nylon glides.
