OVERALL CHAIR DIMENSIONS:

OVERALL STOOL DIMENSIONS:

DIMENSIONS ARE APPROXIMATE

COM YARDAGE:

388/1388: 1 yard for each chair/stool (based on no repeat, non-directional material)

SPECIFICATION:

- Chair and Barstool frame to be constructed from solid kiln dried beech wood. Lumber to be dried to a final moisture content level between 6% - 8%.
- Front Legs to be constructed from single stock lumber. Finished dimension at the top of leg to be 1 5/8" x 1 5/8" tapering to 1 1/4" x 1 1/4" at bottom.
- Rear legs to be constructed from single stock lumber cut to shape. Finished dimensions are 1 1/4" x 1 1/4" and tapers top and bottom. The top of the chair back is integrally joined to the back legs.

- Seat to be 5/8" thick plywood upholstered and applied to the solid beech wood frame. The seat receives high-density CAL-177 FR compliant foam, and is upholstered and attached/screwed to the beech wood frame.
- Back is made of solid beech wood that is attached via mortise and tenon into the upper portion of the back legs and then upholstered.
- Side, front and back stretchers are attached via mortise and tenon into the legs for added strength.
- Barstool has a metal footrest on the front stretcher, finished in Black, Brass or Satin Aluminum.
- The Chair and Barstool frame and seat frame are connected together by dowels, corner blocks, bolts and glue.
- All exposed natural woods are finished in any standard ISA wood finish and clear coated with polyurethane to a semi-gloss finish.
- The Chair and Stool include nail-in nylon glides suitable for most flooring types.
- Bar stool available as counter stool at 24" seat height.
