451-UBP/USP (back pad, seat pad): 1 yard per chair (based on no repeat, non-directional material)

SPECIFICATION:

- Chair frames are constructed of solid kiln dried ash wood. Lumber to be dried to a final moisture content level between 6% - 8%.
- The frames are connected together by dowels, corner blocks, screws and glue.
- Legs are 1.5" diameter at the top, tapering down to 1" diameter at the bottom.
- The seat consists of 1/2" thick plywood and is attached to the main frame via screws and glue.
- The back rest consists of 1/2" thick bent plywood and is attached to the main frame via screws and glue.
- The seat and back pad (when applicable) are approximately 1/2" thick and consist of pliable wood board, covered in high-density foam, meeting CAL 117 FR. Upholstery is then applied as specified.
- All exposed wood can be finished in any standard ISA wood finish. Frames then receive a clear urethane top coat in low gloss for added protection.
- All chairs include nail-in nylon glides suitable for most flooring types.
